

# Test Case

**Project Name:** Simultaneous Exchange

**Test Case ID:** buyStock\_2

**Test Priority:** medium

**Module Name:** Buy Stock

**Test Title:** Buy 10 Shares

**Test Designed by:** Lachlan

**Test Designed date:** 15/04

**Test Executed by:** Mathilde, Peter

**Test Execution date:** 06/05

**Description:** During a scenario, the user attempts to buy 10 shares of a stock if they have sufficient money

**Objective:** Money decreases by cost of 10 shares of chosen stock, volume of stock increases by 10

**Preconditions:** A scenario is currently in progress. The money of the chosen timeline is equal to or greater than the cost of 10 shares of chosen stock.

Step	Test Steps	Test Data	Expected Result	Actual Result	Status (Pass/Fail)	Notes
1	Click on "x10" button in buy part of a stock section of a timeline	N/A	The displayed money field of the timeline decreases by cost of 10 of chosen stocks and the displayed volume in stock section increases by 10	Works as expected	Pass	N/A

**Post-conditions:** The user can continue to play in the scenario, the chosen timeline now owns 10 additional shares of chosen stock.
